

# WALLET OPENING - TRUST WALLET FOR THE KAZANO COIN

## STEP BY STEP - RUNS ON THE ANROID

1) Download [Trust Wallet](#) from Google Play

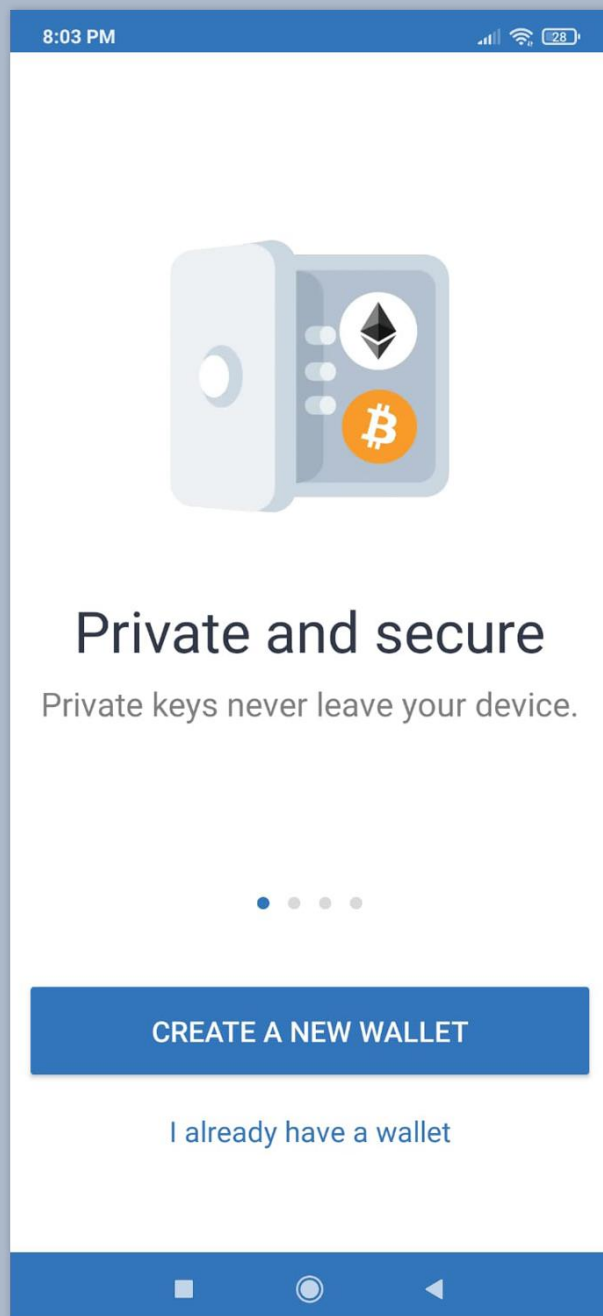

Always make sure that you're downloading your wallets from the real source. Psyching websites are known to pay for Google ads and use other malicious ways to persuade you into downloading a fake wallet.

The only URL of Trust Wallet on Google Play is

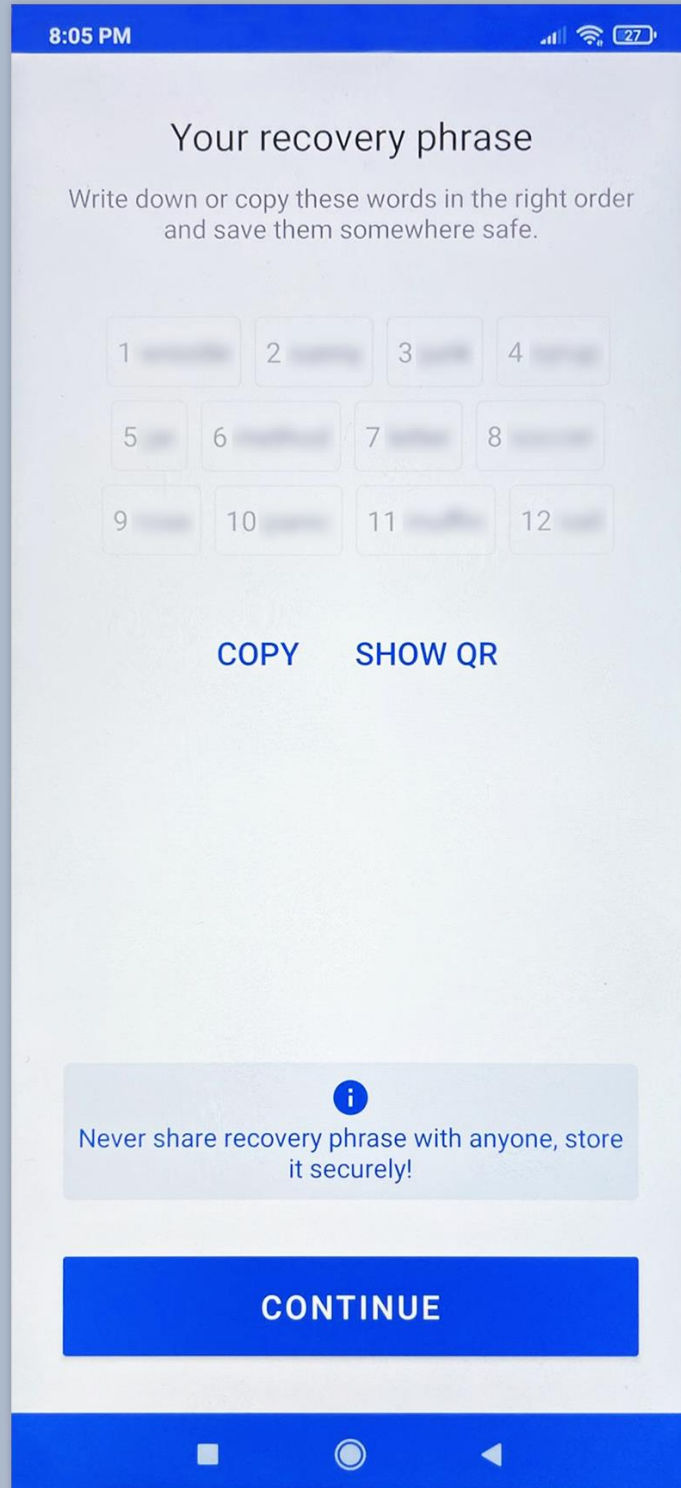

<https://play.google.com/store/apps/details?id=com.wallet.crypto.trustapp>

## 2) Click on "CREATE A NEW WALLET"

(Create a personal password for your wallet - save the password)

### 3) Write the seed phrase on the screen on a piece of paper

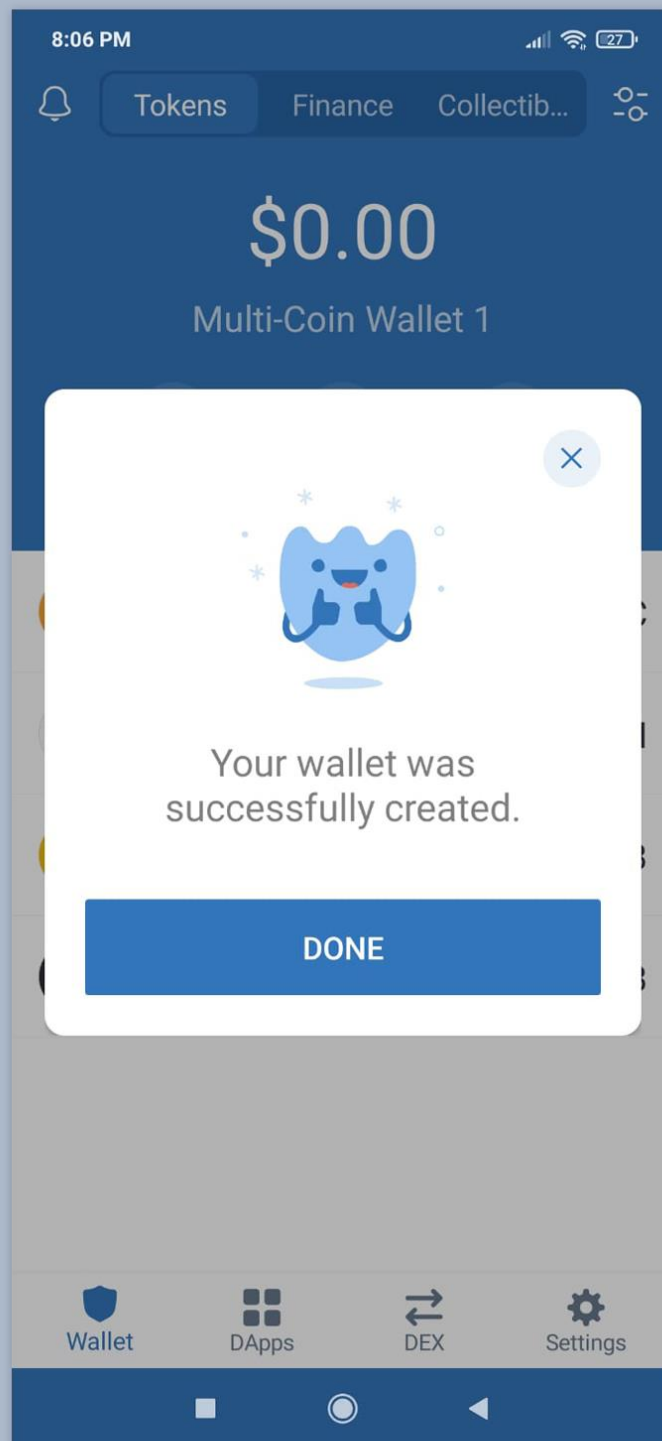

It is very important that you write your [seed phrase](#) on a piece of paper and don't save it on your device. The seed phrase is the only thing one needs to access your wallet, keep it safe.

#### 4) Verify your seed phrase

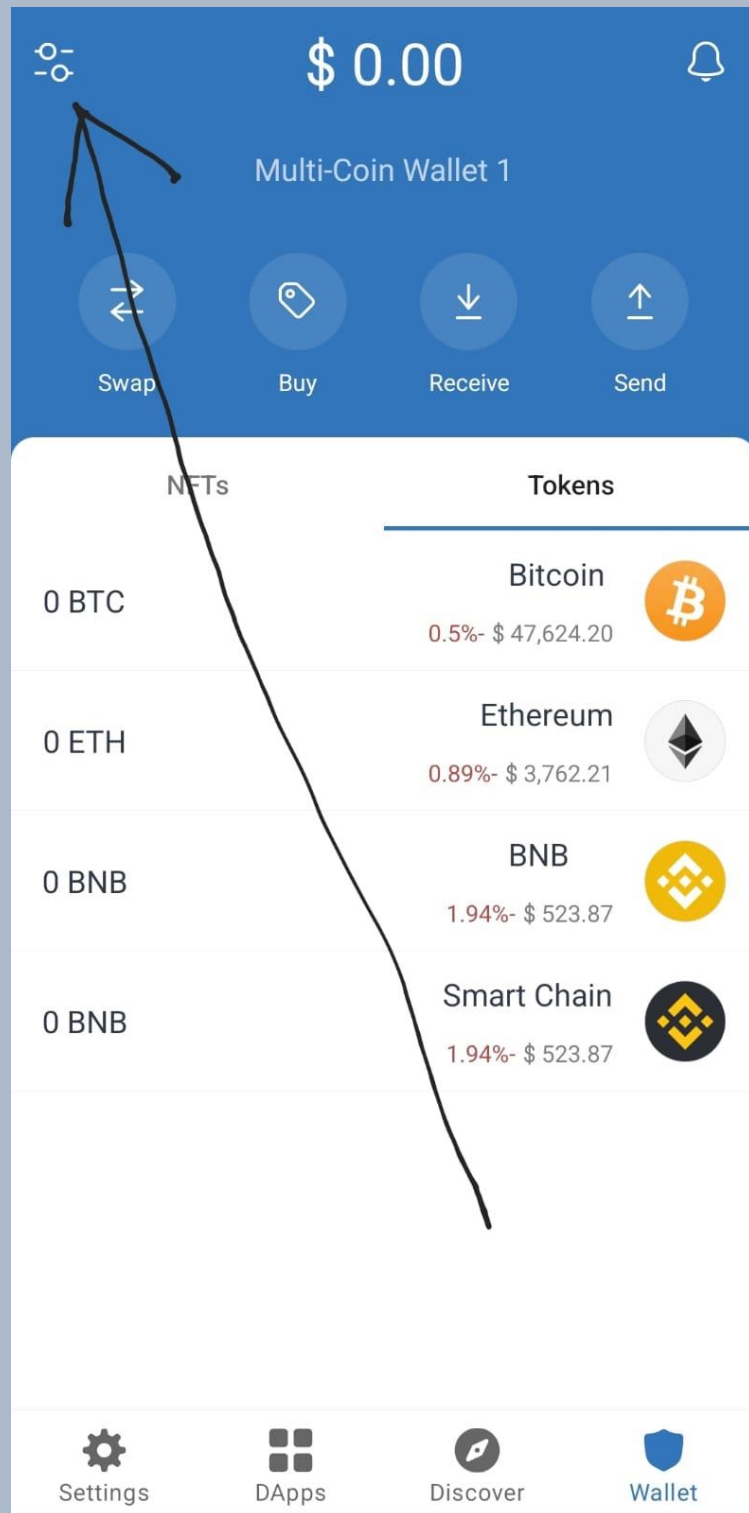

This step was introduced in order to promote the idea of backing up your seed phrase.

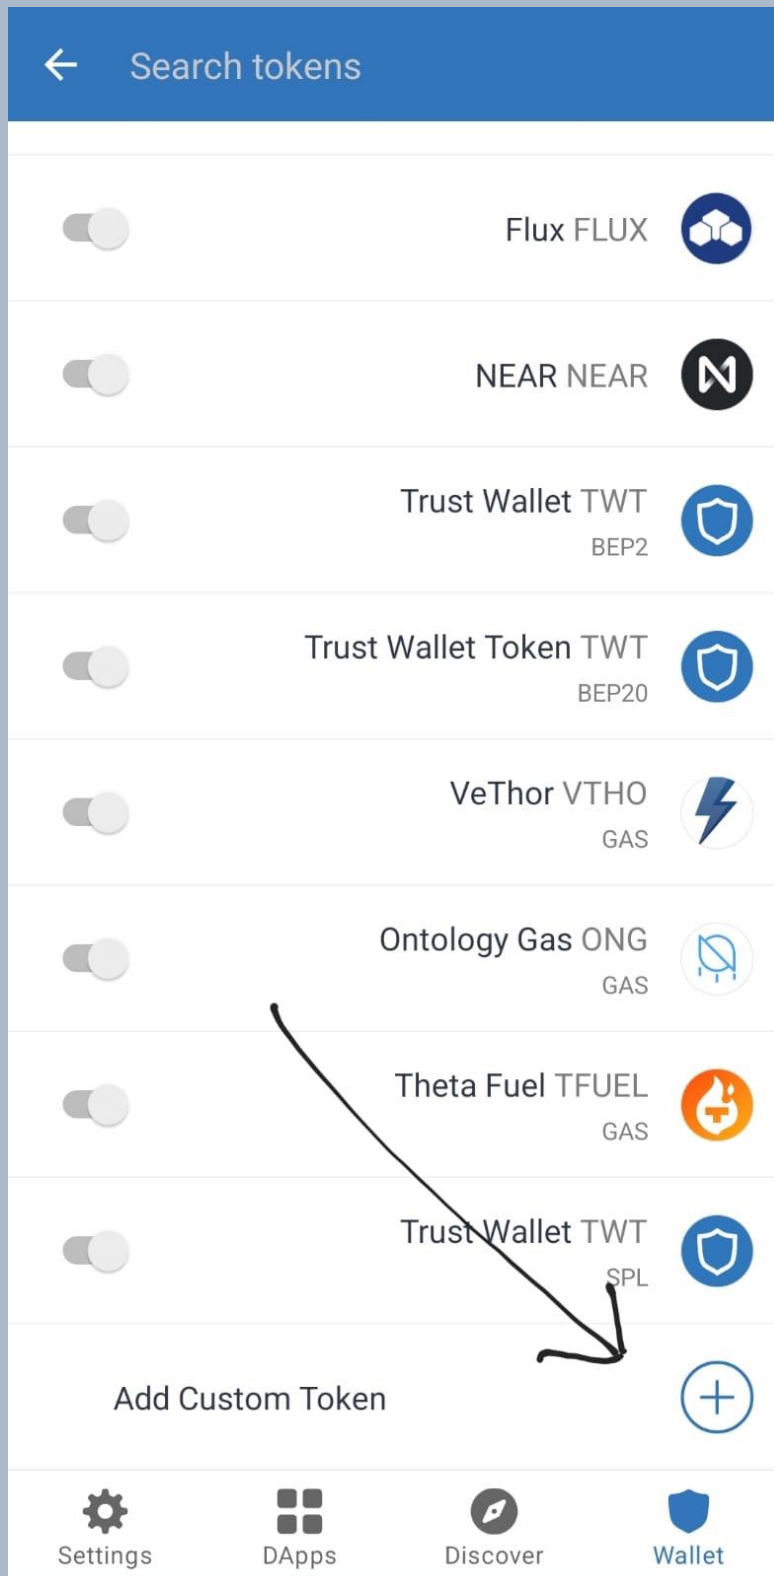

## 5) That's it, you're done!

**6) Now you need to add the KAZANO coin (symbol KAZ) to your wallet - Go to the list of currencies (at the top left of the wallet)**

## 7) Scroll to the bottom and click - Add Custom Token

## 8) In Network, click Ethereum and switch network to Smart Chain

DONE Add Custom Token

> Ethereum Network

 PASTE Contract Address

Name

Symbol

Decimals

Anyone can create a token, including fake versions of existing tokens. Learn about scams and security risks. 

[What is Custom Token?](#)

# Select Asset - חיפוש

12) We will copy as our wallet address to send to this address our KAZANO coins

**13) We will go to our back office in QOOZZA, click on a profile, and there we will paste our personal wallet address, in KAZANO address**

**Of course do not forget to click after that on - Update**

Profile

### Edit Your Contact Details

**First Name**

**Last Name**

**Email**

**Username**

**Country**

**Company Name**

**ITIN/Tax #**

**Kazano Address**

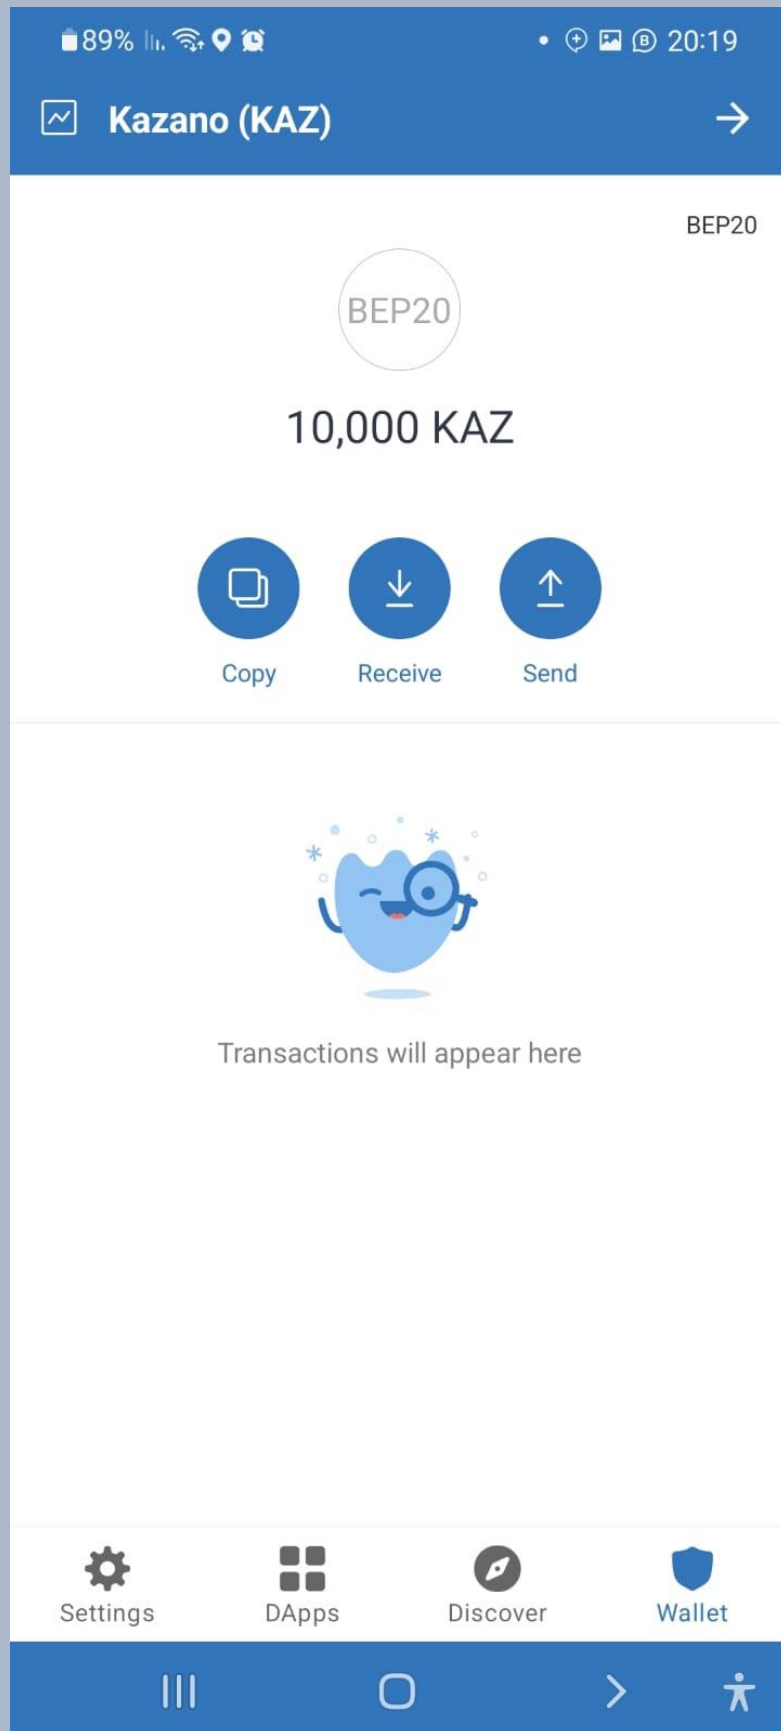

**14) When you want to withdraw your KAZANO coins, enter the tab - My Tokens - Scroll down to the packages you purchased and click the button - Terminate & Withdraw**

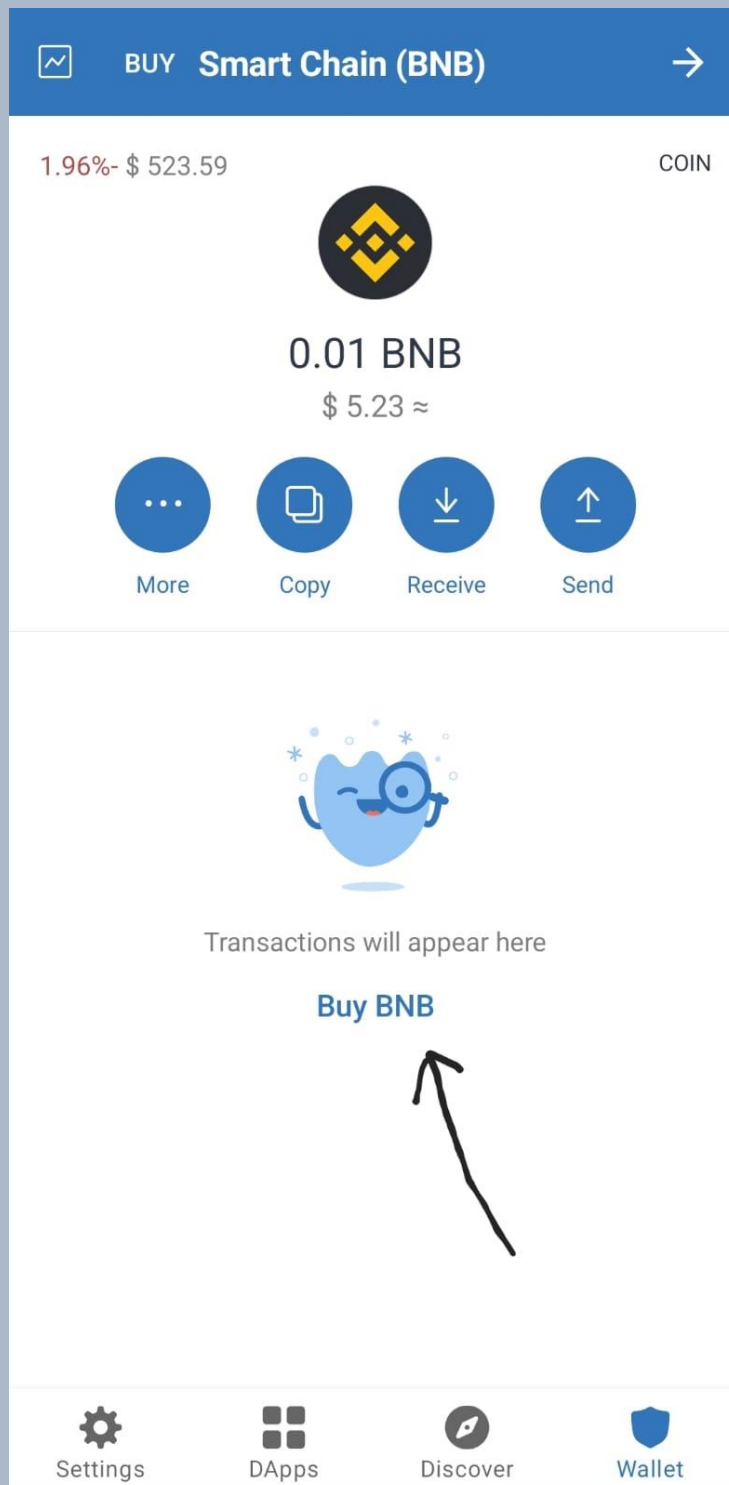

**Terminate & Withdraw**

Date Purchased	USD	Tokens	Annual Interest	Days	Earn Tokens	
2021-05-13	10000	575000	100%	230	362,328.00	 <input type="button" value="Terminate &amp; Withdraw"/>
2021-05-23	10000	0	100%	220	0.00	<input type="button" value="Terminate &amp; Withdraw"/>

## 15) Your wallet will load with KAZANO coins

**16) Note! To send KAZANO coins from your wallet to another wallet or stock exchange - you need to have some BNB coin - for a shipping fee - you can purchase it directly in the wallet using a credit card or purchase it at the various exchanges and load your wallet**

**Congratulations - your KAZNO coins will now be transferred to your private wallet**

**You can now send them to another wallet, buyer, or stock exchange, or to any platform that allows - trading or exchanging KAZANO currencies**

**Some important notes**

**1 -Sending to stock exchanges will be possible only after the official issuance date, and only to the stock exchanges that allow trading in the KAZANO currency, details of which stock exchanges can be used will appear in the guides - close to the official issuance date**

**2 -Receiving the coins for the first time from the back office to the private wallet can take several days, until he receives the approval of the Accounting Department and the release of the deposit, after which when the coins are in a private wallet transferring the KAZANO coins from wallet to wallet takes a few seconds**

**3 -Attention - sending coins from the wallet to any other address (other wallet or currency exchange platform) requires a commission - the commission is paid in the BNB currency, you need to have some BNB in the wallet otherwise the transaction will not be approved**

**4- BNB coins can be purchased on any platform - and on the binance stock exchange using a credit card**

---

## Here are a few things to remember:

1. The tokens on BSC are BEP-20, so if you want to withdraw tokens to your wallet via an exchange, make sure you withdraw them as BEP-20.
2. Every transaction on Binance Smart Chain takes BNB as fees for the validators, the same way Ethereum takes ETH. Don't worry, **it's cheap.**
3. Your Trust Wallet contains your address on multiple blockchains such as: Bitcoin, Ethereum, Binance Chain, and Binance Smart Chain. Since you're here because you want to participate on BSC, your BEP20 wallet is the "Smart Chain" one. **Always copy that address for any incoming transaction** to your wallet such as withdrawing cryptocurrency from an exchange.
4. In order to access applications on the blockchain you will need to do that from a special browser, that "special browser" is on the "Dapps" tab. It works just like a regular browser, but it allows you to connect your wallet to different applications.
5. Sometimes certain tokens you own might not appear in your wallet, if that happens to you simply click on the icon in the top-right corner and search the token name on the search bar at the top; if the token you want to add doesn't appear paste its smart contract address in there.

That's about it, good luck!
